

Suggested Amendments to .200 and .220

3 AAC 46.200(a) The certificate of an electric reliability organization ~~entitles and~~ requires that entity to provide the services described in AS 42.05.762(1), AS 42.05.762(2) and **AS 42.05.780, and entitles that entity to provide the services described in** AS 42.05.775, for the applicable interconnected electric energy transmission network.

Option 2b

3 AAC 46.200(j) The certificate of an electric reliability organization shall expire after six years. Not less than two years prior to the date of expiration the electric reliability organization shall notify the commission if it declines to seek certificate renewal. In the absence of such notice the certificate shall be automatically renewed unless the commission finds, after notice and an opportunity to be heard, that the electric reliability organization no longer meets the relevant requirements of 3 AAC 46.200 for the form of board under which it received its certificate.

Companion version of .200(l) to Option 2b

3 AAC 46.200(l) During any period between one certificate's expiration and the award of a subsequent certificate, the most recently approved tariffed reliability standards shall continue to satisfy the requirements of AS 42.05.291(c).

Other Suggestions

3 AAC 46.200(k) If the commission receives competing applications from entities seeking certification as the electric reliability organization for an interconnected bulk-electric system, the commission shall issue the certificate to the entity that is ~~best~~ able to both **best** fulfil the duties associated with AS 42.05.762 and to most fairly consider stakeholder class interests.

3 AAC 46.220(g)(16) If an applicant proposes a classification that includes a hybrid stakeholder class, an explanation of why the relevant hybrid stakeholder interests cannot be adequately presented or considered if the hybrid stakeholders are exclusively classified as a provider or consumer stakeholders.
